

Srikar Rao

Full-Stack Developer | Blockchain Enthusiast | State-Level Badminton Player

1. Personal Information

Full Name	Srikar Rao
Age	20 years
Date of Birth	22 September 2005
Height	170 cm (5 ft 7 in)
Weight	62 kg
Place of Birth	Mysore, Karnataka, India
Current Residence	Bengaluru, Karnataka, India
Nationality	Indian
Blood Group	A+
Languages Known	Kannada (native), English (fluent), Hindi (conversational)

2. Profile Summary

Srikar Rao is a third-year B.Tech student in Information Technology at PES University, Bengaluru. He is best known on campus as a versatile full-stack web developer and a former Karnataka State Junior Badminton Champion.

Srikar has a strong creative streak that spans both technology and music — he plays acoustic guitar and serves as Vice President of the college music club 'Strings & Beats'. His flagship project, 'Project Vortex', is a full-stack e-commerce platform with real-time inventory management.

With a CGPA of 8.20 / 10.00, Srikar is the youngest of his close friend group and is currently exploring blockchain development through his project 'Project Nexus', a decentralized voting application.

3. Identification & Records

Student Unique ID	STUDENT-SR-2026-0233
University Roll Number	PES-IT-23-0879
Music Club Member ID	STRINGSBEATS-SR-014
Karnataka Badminton Association ID	KBA-JR-22910
Email (Academic)	srikar.rao@pes-students.edu.in

4. Educational Background

Qualification	Institution	Board / University	Result
---------------	-------------	--------------------	--------

B.Tech, Information Technology (2023-2027)	PES University, Bengaluru	PES University (Autonomous)	CGPA: 8.20 / 10.00 (current, through Sem 5)
Higher Secondary (12th Grade, Science)	Vidyodaya Composite College, Mysore	Karnataka PUC Board	91.4% (Aggregate)
Secondary Education (10th Grade)	National Public School, Mysore	Karnataka SSLC Board	GPA: 9.4 / 10.0

5. Academic Performance & Highlights

Srikar scored 90/100 in the 'Web Technologies' course, the highest score in his section of 70 students. He won the college-level coding competition 'CodeSprint 2025', which tested rapid full-stack application development under time constraints.

He has maintained a CGPA between 7.8 and 8.6 across his five completed semesters, with his best semester (Semester 4) reaching 8.60 largely due to strong performance in 'Web Technologies' and 'Software Engineering'.

Srikar is currently completing an elective in 'Blockchain Fundamentals', where his term project, 'Project Nexus', a decentralized voting application, is being evaluated for the department's innovation showcase.

Semester	SGPA	Notable Course
Semester 1	7.80	Introduction to Programming (Python) — Grade B+
Semester 2	8.00	Object-Oriented Programming (Java) — Grade A
Semester 3	8.10	Database Management Systems — Grade A
Semester 4	8.60	Web Technologies — 90/100 (Topper in section)
Semester 5 (ongoing)	8.20 (cumulative)	Blockchain Fundamentals: Project Nexus

6. Skills & Certifications

Technical Skills

- Programming Languages: JavaScript, TypeScript, Python, Solidity
- Frontend Frameworks: React, Next.js, Tailwind CSS
- Backend Frameworks: Node.js, Express.js
- Databases: MongoDB, MySQL
- Blockchain: Solidity smart contracts, Hardhat, MetaMask integration, Ethereum testnets
- Soft Skills: UI/UX design sensibility, agile teamwork, public performance (music)

Certifications

Certification	Issuing Body	Credential ID
Meta Front-End Developer Professional Certificate	Meta / Coursera	META-FE-SR-5512

Ethereum Blockchain Developer Certification	Alchemy University	ETH-BC-SR-2290
Cloud Computing (Silver, 68%)	NPTEL	NPTEL-CC-SR-2025-1190
Responsive Web Design	freeCodeCamp	FCC-RWD-SR-8834

7. Personal & Academic Projects

Project Vortex — Full-Stack E-Commerce Platform

Project Vortex is Srikar's most substantial personal project: a full-stack e-commerce web application featuring real-time inventory management, a customer-facing storefront, and an admin dashboard for sellers. The application supports live stock-level updates using WebSockets, so that inventory counts update instantly across all connected clients when an item is purchased.

Srikar built Project Vortex over one semester as a way to practice the full MERN stack (MongoDB, Express, React, Node.js) and used it as the centerpiece of his portfolio when applying for his summer internship.

Role	Sole Developer (personal project)
Duration	January 2025 - May 2025
Tech Stack	React, Node.js, Express, MongoDB, Socket.IO, Tailwind CSS
Outcome	Used as portfolio centerpiece; secured internship at CodeCraft Solutions

Project Nexus — Decentralized Voting Application

Project Nexus is a decentralized voting application built using Solidity smart contracts deployed on an Ethereum testnet. The application allows registered 'voters' (simulated accounts) to cast votes for predefined candidates, with all votes recorded immutably on the blockchain and results computed transparently via a smart contract function.

Srikar tested the system with 500 simulated votes across multiple test wallets to verify that the contract correctly prevented double-voting and accurately tallied results. The project is being submitted for the IT department's innovation showcase as part of his 'Blockchain Fundamentals' elective.

Role	Sole Developer (elective coursework project)
Duration	February 2026 - present (ongoing)
Tech Stack	Solidity, Hardhat, Ethereum Sepolia testnet, React frontend, MetaMask
Outcome	500 simulated votes tested successfully; pending department showcase

TuneStream — Music Streaming Web App (Side Project)

TuneStream is a side project Srikar started to combine his interests in music and web development: a music streaming web app that generates personalized playlists based on a user's listening history, using a simple recommendation algorithm based on genre tagging and collaborative filtering.

The app currently supports uploading and streaming royalty-free tracks and is used informally by members of the 'Strings & Beats' music club to share their own recordings.

Role	Sole Developer (independent side project)
------	---

Duration	August 2025 - ongoing
Tech Stack	Next.js, Node.js, MongoDB, HTML5 Audio API
Outcome	Used informally by ~25 members of 'Strings & Beats' music club

8. Internship & Work Experience

Organization	Role	Key Responsibilities
CodeCraft Solutions, Bengaluru	Full-Stack Developer Intern (June - August 2025)	Built an internal employee management dashboard from scratch using React and Node.js, including attendance tracking, leave requests, and a role-based access control system used by 80+ employees.

Srikar's internship at CodeCraft Solutions was secured directly on the strength of his Project Vortex portfolio piece. He worked under engineering manager Mr. Arvind Nair and received positive feedback for delivering the employee management dashboard two weeks ahead of schedule, leading to an informal offer for a part-time remote role during his final year.

9. Awards & Recognitions

Award / Recognition	Year	Details
Winner — CodeSprint 2025	2025	College-level coding competition (full-stack rapid development category)
Karnataka State Junior Badminton Champion	2023	Singles category, Under-18 division
Best Volunteer Award — Pulse 2025 Tech Fest	2025	Recognized for coordinating volunteer logistics for the festival
Runner-up — Smart India Hackathon	2024	Team ByteForce, Project Sentinel (Disaster Management theme)

10. Extracurricular Activities & Team Collaborations

- Vice President, College Music Club 'Strings & Beats' — organizes monthly open-mic nights and has personally performed acoustic guitar sets at three campus events
- Captain, PES University Badminton Team — leads weekly practice sessions and represents the university in inter-collegiate tournaments
- Volunteer Coordinator for 'Pulse 2025', PES University's annual technical festival, managing a team of 30 student volunteers
- Occasional contributor to the PES Web Development student community, helping juniors debug React applications

Srikar's most notable team collaboration is with 'ByteForce', the three-member interdisciplinary team formed for the Smart India Hackathon 2024: Rithesh Kumar Reddy (hardware and sensor integration lead), Abhinav Sharma (machine learning lead), and Srikar Rao (front-end dashboard developer, responsible for the citizen-facing reporting interface). Their project, 'Project Sentinel', an AI-assisted

disaster response coordination platform, finished as Runners-up (2nd place) in the Software Edition under the Disaster Management theme.

Within the 'Strings & Beats' music club, Srikar frequently collaborates with fellow member Tanvi Joshi on co-written acoustic arrangements for open-mic performances.

11. Hobbies & Interests

- Badminton — former Karnataka State Junior Champion (Under-18, Singles, 2023); now plays primarily as a recreational and team-captain role
- Playing acoustic guitar — performs covers and a handful of original songs at college open-mic nights
- Cooking — enjoys experimenting with South Indian recipes, particularly variations on dosa batter and chutneys
- Watching football, particularly following the Indian Super League and English Premier League
- Exploring new JavaScript frameworks and tools in his spare time as a form of relaxation

12. Strengths & Weaknesses

Strengths	Weaknesses
Very quick learner, especially with new frameworks and tools	Relatively weak in advanced mathematics and statistics courses
Strong sense of UI/UX design and visual polish	Tends to underestimate how long projects will take to complete
Good communicator, comfortable presenting to both technical and non-technical audiences	Occasionally disorganized with project documentation and version control commit messages
Adaptable across both frontend and backend development	Can lose focus on a project once the 'fun' core feature is built, leaving polishing for later

13. Future Goals & Aspirations

Srikar's primary goal is to secure a full-time role as a full-stack developer at a well-established product company after graduating in 2027, ideally one with a strong engineering culture and mentorship programs for junior developers.

In parallel, he hopes to deepen his Web3 skills through Project Nexus and related coursework, with an eye toward eventually contributing to open-source blockchain infrastructure projects.

His long-term ambition is to turn his side project 'TuneStream' into a small commercial product aimed at independent musicians who want a simple platform to share their music with fans, potentially launching it as a startup alongside friends from the music club.

14. Daily Routine & Preferences

07:00 AM	Wakes up, light breakfast (usually dosa or upma)
----------	--

08:00 AM - 09:00 AM	Filter coffee and review of the day's class schedule
09:30 AM - 04:00 PM	Classes and lab sessions at PES University
04:30 PM - 06:00 PM	Badminton team practice
06:30 PM - 07:30 PM	Guitar practice or 'Strings & Beats' club activities
08:00 PM - 09:00 PM	Dinner with hostel friends, often cooking together
09:30 PM - 12:00 AM	Coding on Project Vortex / Project Nexus, usually with indie or acoustic music playing
12:30 AM	Lights out

15. Friends, Mentors & Notable Milestones

Srikar's primary academic mentor is Prof. Karthik Subramanian, Assistant Professor of Web Development at PES University, who guided him through Project Vortex and encouraged him to apply for the CodeCraft Solutions internship.

His closest friends outside PES are Rithesh Kumar Reddy and Abhinav Sharma, both met through team ByteForce during the Smart India Hackathon 2024. Srikar is the youngest of the trio and often jokes that he 'represents the front-end' in every conversation.

Within his hostel, his closest friend and badminton doubles partner is Naveen Gowda, with whom he also occasionally collaborates on small coding side projects.

Unique Milestones

- Started playing badminton at age 8 under a local coach in Mysore; became Karnataka State Junior Champion at age 17
- Built his first website (a simple portfolio page) at age 15 using basic HTML and CSS
- Won his first hackathon-style competition, 'CodeSprint 2025', in his third year of college
- Took up the guitar at age 14, initially self-taught using online tutorials, and performed his first open-mic set at age 18
